WORK EXPERIENCE

Software Engineer — Metasoft360 shpk · Tirana, Albania · June 2025 – Present

- Build and maintain production web and cross-platform applications with Angular, React and Blazor across several client products.
- Design and optimize SQL Server databases and T-SQL stored procedures: joins, pagination, aggregation, query debugging and performance tuning.
- Deliver features end to end, from data model and stored procedures through REST APIs to responsive, component-based UIs.
- Integrate third-party services and payment gateways (PayPal) into front ends backed by REST APIs.
- Troubleshoot and resolve issues across the whole stack, tracing problems from UI to API to database.
- Work in a team using Git and CI/CD workflows, writing clean, reusable and maintainable code.

EDUCATION

Game Design and Development (BSc studies, 2 years completed) — Estonian Entrepreneurship University of Applied Sciences (EUAS), Tallinn, Estonia

TECHNICAL SKILLS

- **Languages:** C#, Java, JavaScript, SQL (T-SQL), HTML, CSS
- **Frameworks & Tools:** Angular, React, Redux, Blazor, .NET, Spring Boot, Tailwind CSS, Vite, REST APIs, Unity
- **Databases:** SQL Server (T-SQL, stored procedures, query optimization), PostgreSQL
- **Version Control:** Git, CI/CD
- **Core Skills:** full-stack development, API and payment integrations, cross-platform development, debugging and troubleshooting

PROJECTS

- **JSuite360** — SaaS platform for deadline and compliance management of vehicles, employees and work records, delivered as a web application and a Blazor iOS/Android app
- **Koki** — full-stack web application (front end, API integration and SQL Server)
- **TruckMove** — cloud-based fleet and operations platform for concrete producers and logistics companies, covering real-time vehicle tracking, digitized paperwork and vehicle assignment planning
